

Indiana Achieves 100% Online Hazmat Reporting in First Year

Challenges

- Businesses and Compliance Authorities needed a more efficient chemical validation process in place to identify EHS and other hazardous chemicals and to tally complex chemical rules.
- Compliance authorities needed a more efficient process to collect fee payments.
- Businesses needed an easier method to report hazardous chemicals inventories.
- Businesses and Compliance Authorities needed a single online system to handle all sections of the EPCRA law.
- County Emergency Planners needed an on-demand system to export and access information anytime.

Gains after Implementing Hazconnect

- **100% online reporting in the first year of using the Hazconnect solution.**
- **Online payments for current and past filing periods were collected and posted as reports were submitted.**
- **The full program for thousands of users was managed with 2 full-time and 2 part-time support during the reporting period.**
- **All LEPCs currently have the ability to retrieve, share, and export information on demand as needed.**
