

## Challenges

- Two administrative assistants took months to enter data delaying access to critical hazmat planning information.
- State, county, and local fire departments were doing the SAME WORK at each level of government, wasting precious time and resources.
- Responders and Planners did not have access to critical Hazmat information.
- Lots of paper in the process. Reports were sent in hard copy. Hazmat Permits were mailed out.

## Nevada gets more Eco-Friendly with Hazconnect

- Hazconnect has helped the state become more eco-friendly with Hazmat Permits being made available online in the system instead of being issued as paper mail copies.

## Gains after Implementing Hazconnect

- **99% of reports are reported online providing instant access to view changes in the risk scenario.**
- **State Fire Marshal schedules and dispatches non-compliance inspections quickly. Identified hidden risks of non-reporting facilities.**
- **Emergency Planners rely on Hazconnect for hazmat plan development and hazard analysis.**
- **All stakeholders have total visibility.**
- **More than 250+ Responders and Planners were trained throughout the state.**
- **Instant data sharing across all 17 County Emergency Management Agencies.**
- **Single system is available for data access for the 182 fire departments.**
- **Thousands of dollars are saved at the state and local level by reducing data collection and data entry of paper reports.**
